

Workshop

Strategies for Delivering Effective Green
Infrastructure and
Improving Urban Forest Canopy

Administration

- + Introduce Yourself and what you do.
- + Choose Facilitator and write name on the document
- + Choose a Scribe and write name on the document
- + Post-it notes for individual ideas

The Challenge

- + To maintain/increase canopy
- + To continue with development needs – e.g. housing, industry, carparking, transport, etc

Step 1 Car Park Challenge

+ Articulate the task/challenge

Example. To provide car parking and maintain/increase canopy cover in the city to the 40% required by state government or local council – whichever is greater

Step Two Car park Challenge

- + **List the Views of Stakeholders**

- + Minister – Wants canopy targets and as many car places as possible.
- + Council - Wants to have some trees as part of the design
- + Nearby Businesses – want to be able to use the car park
- + Nearby Businesses – DON'T want disruption to business
- + Residents – Don't want the noise of the cars and don't want the car park

Step Three – Brainstorm Options

- + Option 1
- + Option 2
- + Option 3
- + Etc

Step Four – Evaluate Options

	<i>PROS</i>	<i>CONS</i>
Option 1		

	<i>PROS</i>	<i>CONS</i>
Option 2		

Step 5 – Choose Options or devise Solutions

Process

- + Admin – Introductions, table ID, choose facilitator and scribe
- 1. Articulate the Challenge/Task
- 2. List views of Stakeholders
- 3. Brainstorm Options
- 4. Evaluate Options
- 5. Choose Option or Devise Solution

Reporting

- + Due to the short time of the session you won't be reporting back now, however a collation of the ideas will be emailed to you and relevant people
